ETS-Lindgren's RGB Ambient Innovative Lighting Systems create an unparalleled experience of comfort and aesthetics. Our RGB Ambient Rope Lights, RGB Ambient Strip Lights, and Accent Strip Lights Plus Controllers are designed to enhance any space with versatile, customizable, and patient-focused lighting solutions.

Enhance any medical or relaxation space with ETS-Lindgren's advanced lighting solutions, blending functionality with comfort and style.

Features

RGB Ambient Rope Lights Plus Controller

Elevate aesthetics, mood, and patient comfort with our customizable RGB Ambient Rope Lights. Designed for ultimate flexibility, these lights can be fabricated to any length and configured into any shape or pattern, seamlessly blending into your space. Adjust color and brightness effortlessly using the dimmer/controller, creating the perfect atmosphere for every occasion.

RGB Ambient Strip Lights Plus Controller

Transform your environment into a tranquil and calming retreat with the RGB Ambient Strip Light System. These lights are easy to install and offer a programmable, multi-color visual experience to relax and soothe patients. Choose from a range of control options, including DMX dimming, high-end wall-mounted systems with iPad control, or convenient remote iPad control, to tailor the lighting experience to your needs.

Accent Strip Lights Plus Controller

Experience long-lasting, comfortable white lighting with our Accent Strip Lights, designed for low-temperature illumination perfect for MRI rooms and suites. These lights combine practicality with ambiance, featuring slide dimmer controls that allow seamless transitions between bright task lighting and soft, low-light settings for a serene atmosphere.
