

## SOFTWARE VALET (VOICE-ACTIVATED LAB ENVIRONMENT)

### VALET

- Voice-activated interface
- Hands-free Convenience
- Efficient Control of Lab Environment
- User Friendly

**ETS-Lindgren's VALET™ (Voice-Activated Lab Environment)** is redefining the future of measurement systems by bringing next-generation technology to today's testing environments. Designed to enhance efficiency, precision, and user convenience, VALET utilizes an intuitive voice-activated interface that provides seamless hands-free control over chambers, instrumentation, and advanced software tools.

### Key Features

- **Hands-Free Operation:** Increase productivity and minimize manual interactions with a fully voice-controlled interface.
- **Seamless System Integration:** Effortlessly command chambers, measurement instruments, and software tools using simple voice prompts.
- **Enhanced Efficiency and Precision:** Reduce setup times and streamline complex testing procedures with intelligent automation.
- **User-Friendly Innovation:** Intuitive commands allow for an effortless and highly responsive testing environment.
- **Scalable and Future-Ready:** Designed to adapt and integrate with evolving lab technologies for long-term usability.

With VALET, ETS-Lindgren delivers a groundbreaking solution that elevates lab operations to new levels of convenience and performance. Experience the power of hands-free control and revolutionize the way you interact with your testing environment—because the future of measurement is now.
